For two years I was co-leader of the Long-Baseline Neutrino Experiment, whose massive detector was proposed for that facility.

9. Please state your interest in this appointment. For example, what would you like to see accomplished?

I have worked for a dozen years towards the development of an experiment capable of unlocking the secrets of the neutrino – the most abundant known matter particle in the universe. The facility established at the former Homestake Mine in Lead, SD by the South Dakota Science and Technology Authority can make this possible. This appointment will allow me to use my experience to help make this a reality.
